

BT7853

HEAVY DUTY Ø50MM POLE

Designed for large scale pole mounted installations; the **BT7853** is a heavy duty alternative to standard Ø50mm poles. Made from 3.2mm thick steel capable of supporting heavier loads, poles are available in 2m or 3m lengths which can then be cut to an exact length if required. Safety bolt holes at the top and bottom of the pole are included for a secure installation. The BT7853 is internally unobstructed for cables to pass through easily and poles can also be fixed together to create even larger installs, using BT7824 External Pole Joiner.

SPECIFICATIONS

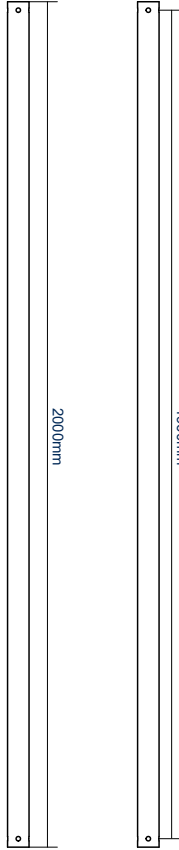

Steel thickness	3.2mm
Max load	350kg
Lengths available	2m, 3m
Colour	Black

FEATURES

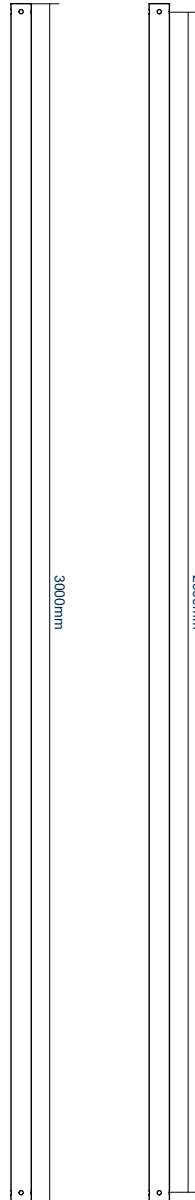

- 1 Can be mounted from floors, ceilings or both for more mounting flexibility
 - 2 Poles can be linked together using BT7824 External Pole Joiners
