

BT8380-EXTV

SYSTEM X™ COLUMN EXTENSION KIT

The **BT8380-EXTV** is an extension kit designed to extend vertical columns to a desired height, perfect for creating extra tall videowalls and other digital signage installations. The kit consists of 4 steel joining bars which fit into the channels inside the column. The joining bars are then held firmly together using the internal grub screws and hex bolts. The underside of the joining bars feature spring-loaded bearings which allows the bars to move easily into their fixed position.

SPECIFICATIONS

Joining Bars per kit	4
Colour	Silver or Black

FEATURES

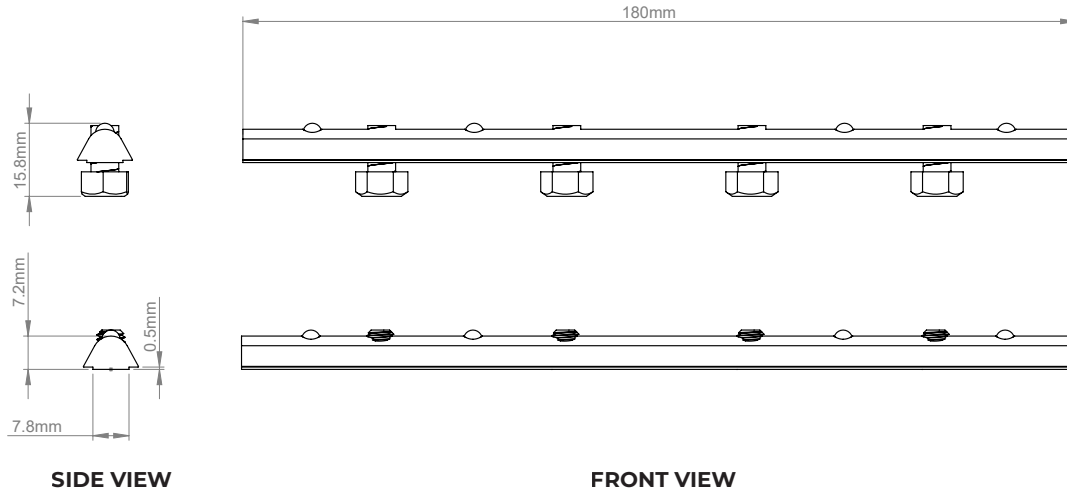

- 1 Columns slide easily into position to create a seamless join
 - 2 Securely lock the columns in place using the internal grub screws and locking bolts
 - 3 Spring-loaded bearings allow the joining bars to move easily into position
 - 4 Seamless finish maintains the premium quality of the product
- Combines BT8380 Vertical Columns to create taller installs
 - Includes 2 bars with hex bolts to make rear assembly quicker
