

BT9240-SP

dvLED VIDEOWALL ROW HEIGHT ADJUSTMENT SPACER FOR SYSTEM XPRESS

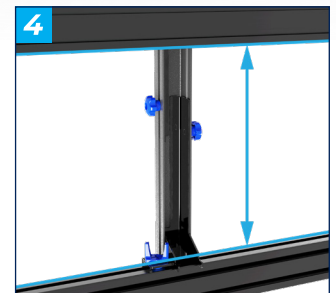

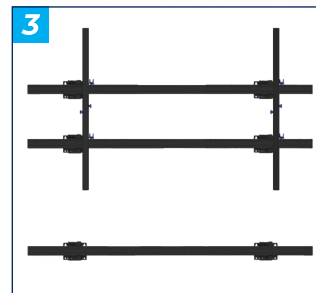

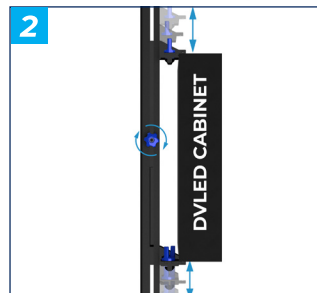

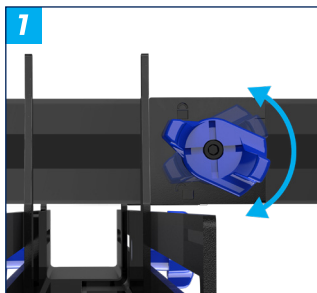

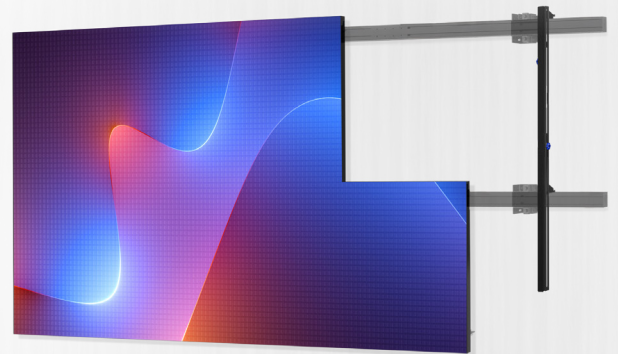

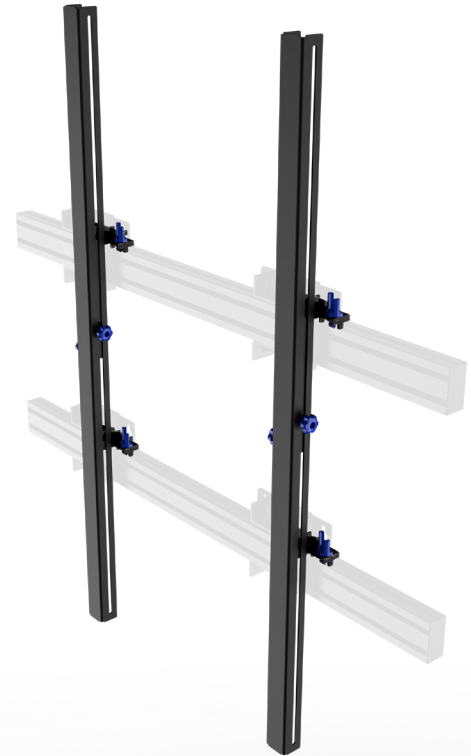

The **BT9240-SP** is a component of **B-Tech's System Xpress** range, designed to provide accurate spacing between dvLED mounting rails and to speed up installations. Simply fix the bottom rail, then use the spacers to accurately set the height of the second, third rail etc. Reusable and supplied in pairs, the universal spacers work with the most common cabinet sizes, and can be used for single and double row spacing. The tool-less vertical adjustment is easy to use and once the clamp height is set using the cabinets as a guide, lock the Spacer onto the rail with a simple turn and click. Engineered for fast and efficient assembly, the BT9240-SP should be used in conjunction with System Xpress dvLED videowall mounting kits.

SPECIFICATIONS

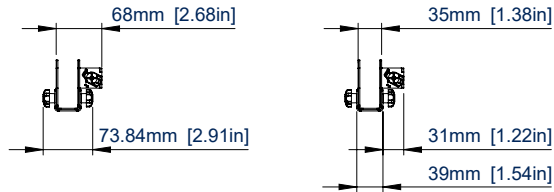

Suitable for cabinet heights	250mm up to 1270mm
Compatible with common cabinet sizes	250, 337.5, 343, 500mm
Compatible with portrait cabinets	up to 610mm
Supplied in Pairs	

FEATURES

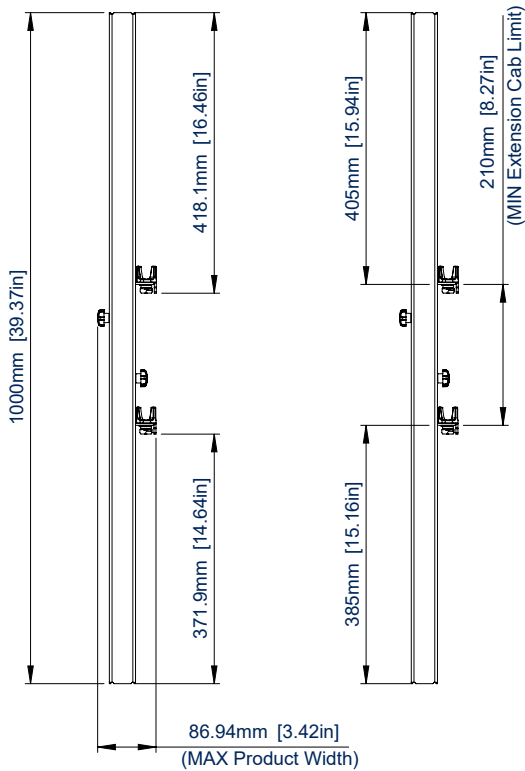

- 1 Features a simple to use design, 'click' to lock spacer onto rail
 - 2 Tool-less clamp height adjustment for a straightforward assembly
 - 3 Speeds up rail mounting for single and double rows by eliminating the need for measuring during installation
 - 4 Ensures accurate and consistent row height alignment of horizontal rails on dvLED videowalls
- Universal spacer fits the most common cabinet sizes
 - Adjustable clamps adapt to different environments, e.g. when working close to a ceiling
 - Suitable for both landscape and portrait installations
 - Compatible with BT8392 and BT8390 Mounting Rails
 - Reusable for multiple installations
 - **100% plastic free packaging**
