

BT8390-CFC

CABLE MANAGEMENT FRONT CLIPS FOR BT8390 MOUNTING RAILS

The **BT8390-CFC** Cable Management Front Clips are designed to provide a simple, effective, and visually clean solution for organising cables on the BT8390 mounting rail. These clips allow for secure routing of multiple cables while maintaining a neat installation and ease of access. With a robust yet discreet design, they offer reliable, straightforward assembly, and a professional finish, making them an ideal addition to any System X installation where cable organisation is essential.
