

BTXPT-TK3

SIDE AND BOTTOM TRIM KIT FOR SYSTEM XPERT LED VIDEOWALLS

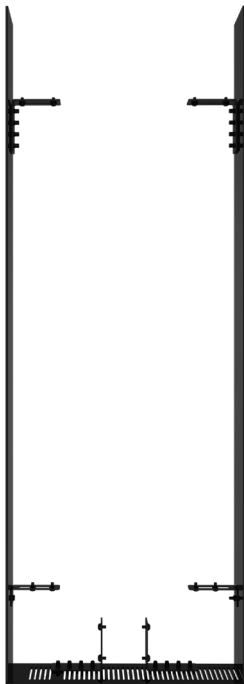

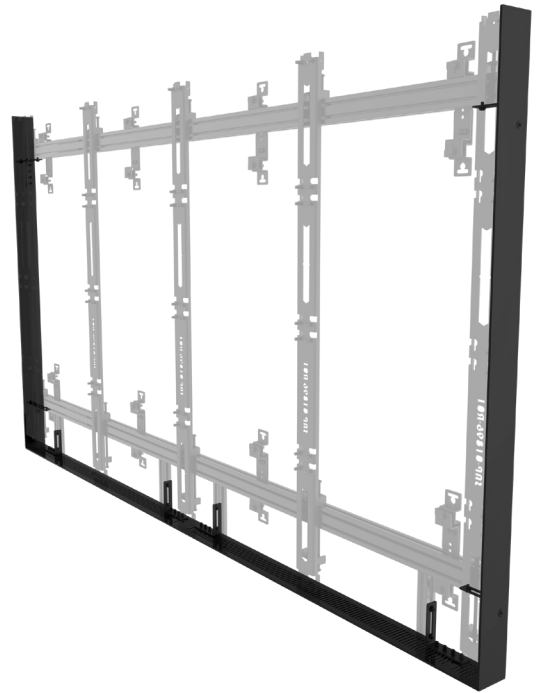

The **BTXPT-TK3** is a set of side and bottom trims, custom cut to precisely match the height and depth of the LED videowall installation. Designed for use with System Xpert mounting solutions, the trims provide a neat, professional finish concealing the exposed sides of the mounted display. By attaching directly to the mounting rails, rather than the LED cabinets, the trim kit helps protect cabinets and modules from potential damage and with multiple fixing points provide a flexible and easy installation.
