

BT7853

HEAVY DUTY Ø2" POLE

Designed for large scale pole mounted installations; the **BT7853** is a heavy duty alternative to standard Ø2" poles. Made from 0.13" thick steel capable of supporting heavier loads, poles are available in 2m or 3m lengths which can then be cut to an exact length if required. Safety bolt holes at the top and bottom of the pole are included for a secure installation. The BT7853 is internally unobstructed for cables to pass through easily and poles can also be fixed together to create even larger installs, using BT7824 External Pole Joiner.

SPECIFICATIONS

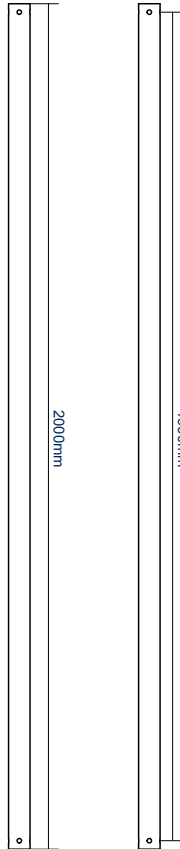

Steel thickness	0.13"
Max load	771lbs
Lengths available	2m, 3m
Color	Black

FEATURES

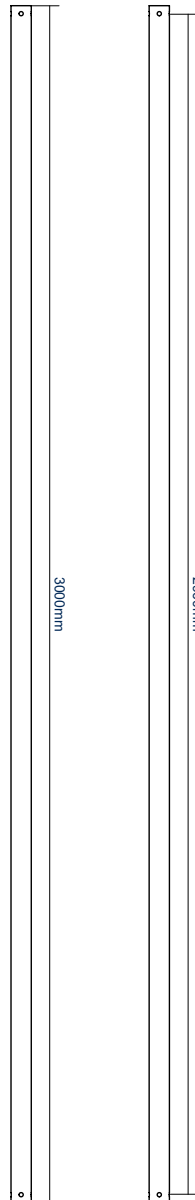

- 1 Can be mounted from floors, ceilings or both for more mounting flexibility
 - 2 Poles can be linked together using BT7824 External Pole Joiners
